

# Rawan Ghonaim

Cairo, Egypt | P: +20 127 596 9490 | E: [rawanghoniama@gmail.com](mailto:rawanghoniama@gmail.com) | LinkedIn | GitHub

## SUMMARY

---

Aspiring Front-End Developer with a CS background and projects in web apps and UI implementation. Skilled in HTML, CSS, JavaScript, and responsive design, with a solid understanding of accessibility and Git workflows. Eager to contribute to production environments and deliver intuitive, user-friendly interfaces.

## EDUCATION

---

### BENHA UNIVERSITY

2022 - 2026

Bachelor of Science in Computer Science

GPA: 3.3/4.0

## EXPERIENCE

---

### Digital Egypt Pioneers Initiative (DEPI) – Front-End Development Trainee

Jun 2025 – Dec 2025

- Training in React.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Git & GitHub
- Gaining basics of Node.js & MongoDB
- Developing communication, freelancing, and career skills

## SKILLS

---

**Technical:** HTML, CSS, JavaScript, React, Bootstrap, Tailwind, C++, Python, SQL

**Tools:** Git, GitHub, VS Code, Oracle SQL Developer, Packet Tracer

**Soft Skills:** Problem Solving, Teamwork, Communication, Time Management, Adaptability

## PROJECTS

---

### Book Website – PHP, HTML, CSS, JavaScript

- Developed a dynamic website to display books, their details, and external reading links.
- Implemented database connectivity with PHP for managing book data.

### Omnifood – Responsive Website (Bootstrap)

- Built a responsive landing page for a food delivery application using HTML, CSS, and Bootstrap.
- Applied reusable classes and the grid system to maintain layout consistency.

### Hotel Management System – Java (Swing), MySQL

- Developed a desktop application to manage hotel reservations, rooms, and customers.
- Designed a user-friendly GUI using Java Swing with drag-and-drop features.

### Gym Management System – Python, SQLite

- Created a system to manage memberships and trainer information.
- applied full CRUD operations with SQLite database.

### Traffic Sign Classification – Python, TensorFlow

- Built and trained a CNN model to classify traffic signs with preprocessing and evaluation.
- Achieved high accuracy and saved the trained model for deployment.

## ACTIVITIES

---

### Google Developer Groups (GDG) – Core Team Member (Technical)

Jan 2025

- Supported front-end sessions (HTML, CSS, JavaScript) during GDG Bootcamp.
- Organized technical workshops.

### ECPC (Egyptian Collegiate Programming Contest) – Participant

2023, 2024

## LANGUAGES

---
